Make & Model Of Hot Water Unit			
Cold Water Supply from Main / Tank			
Cold Water Temp To Hot Water Unit			
Hot Water Temp From Hot Water Unit			
Cold Water Pressure at Unit			
Hot Water Pressure at Unit			
Pressure Reducing Valve fitted			
Valve Installed to requirements of	Drawings And Specifications		
	Manufacturer's Instructions		
	TMV Code		
	Local Authority		
If No, Give Details of actions taken			

Test Results (Repeat for every Valve)

Valve Location in Building	
Room Area Designation	

Fixture type	Non Return Test Pass/Fail	Fixture Flow Rate of Design (L/min)	Cold Water Dynamic Pressure	Hot Water Dynamic Pressure	Temperature of Warm Water

Note: an accurate digital thermometer is necessary for the temperature measurements.

Warm Water Temperature Setting	
Fail Safe at both minimum and maximum flow rates (Pass or Fail)	
Business Name of Plumbing Contractor	
License Number of contractor
