

The **Government Information (Public Access) Act 2009** is designed to meet community expectations for more open, accountable and transparent government. The Act requires councils to record and publish information about contracts when entered into with the private sector. A register of government contracts is mandatory open-access information, required under sections 6 and 18 of the GIPA Act. How this information is made available is prescribed in Part 3, Division 5 (sections 27 - 40 inclusive). The register must be published on Councils website and made public in any other way Council decides.
